

4.2. User - Change password

Id	4.2.
Description	As a Generic User I want to be able to change my password So that I can keep my account secure
Priority	High
Actors	User
API Calls	N/A
Linked Processes	
Status	Implemented - Only user with access to django-admin use password authentication, and therefore only these users can perform a password change via UI. API users, use API keys and don't have passwords to manage.

Preconditions

1. The **User** must be authenticated.
2. The **User** must know his old password

Postconditions

1. The System returns a confirmation that the password has been reset.

Main flow

1. The **User** triggers a credential change via the django-admin UI.
2. The system returns a confirmation indicating the the password has been updated.

Exceptions

[400 Bad Request] Invalid input:

If mandatory fields are missing or invalid, the system returns an error message.

[500 Internal Server Error] System Error

If the system fails to save changes due to an internal error, it displays an appropriate message and logs the error for further investigation.
