

4.26. Organisation Administrator

- Un-reject/approve an approved/rejected record lined to organisation

Id	4.26.
Description	<p>As an Organisation Administrator</p> <p>I need to be able to un-approve/reject a record belonging to my organisation that was unintentionally rejected/approved.</p> <p>So that I can rollback invalid changes and allow the approvers to correct their mistakes.</p>
Priority	Medium
Actors	Organisation Administrator
API Calls	POST /physical-links/<physical_link_id>/reset-approval/
Linked Processes	
Status	Implemented

Preconditions

1. The User must be authenticated and have the **Organisation Administrator** role.
2. The User must have an approved/rejected record that belongs to his organisation and that he wants to un-approve/reject

Postconditions

1. The System rolls back the approval/rejection.

Main flow

1. The **Organisation Administrator** retrieves a record marked as approved/rejected that belongs to his organisation.
2. The **Organisation Administrator** un-approves/rejects the record.
3. The system validates the request parameters.
4. The system rolls back the approval/rejection.

Exceptions

[400 Bad Request] Invalid input:

If mandatory fields are missing or invalid, the system returns an error message.

[400 Bad Request] Record already approved / un-approved:

If the user tries to approve a record that is already approved an error is returned.

[404 Not found] Data not found

If the **Organisation Administrator** attempts to un-approve/reject a resources that does not exist or does not belong to his organisation, the system will return an error.

[409 Not approved/reject] Data not marked as approved or rejected

If the **Organisation Administrator** attempts to rollback a resources that is not marked as approved or rejected, the system will return an error.

[500 Internal Server Error] System Error

If the system fails to save changes due to an internal error, it displays an appropriate message and logs the error for further investigation.
