

4.31. Editor - Add a site

Id	4.31.
Description	As an Editor , I want to be able to create a site for an address that already exists in the register, So that I am not blocked by missing information and can perform my contribution.
Priority	High
Actors	User
API Calls	POST /sites
Linked Processes	
Status	Implemented

Preconditions

1. The User must be authenticated and have the **Editor** role.
2. The User has on or more addresses to which the new site needs to be assigned to.
3. The User has the mandatory site information

Postconditions

1. The system returns the created site

Main flow

1. The **Editor** uses an API call to create a new site for a given list of addresses.
2. The system validates the input parameters.
3. The system returns the created site

Exceptions

[400 Bad Request] Invalid input:

If mandatory fields are missing or invalid, the system returns an error message.

[409 Conflict] Addresses already used

Error returned by the system if the all or some of the given address are already linked to another site or block.

[500 Internal Server Error] System Error

If the system fails to save changes due to an internal error, it displays an appropriate message and logs the error for further investigation.
