

# 4.32. Editor - Update a site

<b>Id</b>	4.32.
<b>Description</b>	As an <b>Editor</b> ,  I want to be able to update the site information,  So that I can correct the site's name and/or contact if it is missing or wrong.
<b>Priority</b>	<b>High</b>
<b>Actors</b>	Editor
<b>API Calls</b>	<b>PATCH</b> /sites/<site-id> <b>PUT</b> /sites/<site-id>
<b>Linked Processes</b>	
<b>Status</b>	<b>Implemented</b>

## Preconditions

1. The User must be authenticated and have the **Editor** role.
2. The User has a valid site ID to update
3. The User has new name or contact information to assign to the site

## Postconditions

1. The system returns the updated site

## Main flow

1. The **Organisation Editor** uses an API call to update a specific site by ID (PUT / PATCH).
2. The system validates the search parameters.
3. The system returns the list of sites that match the searched address.

## Exceptions

[400 Bad Request] Invalid input:

If mandatory fields are missing or invalid, the system returns an error message.

## **[404 Not Found] Site not found**

Error returned by the system if the site is not found.

## **[409 Conflict] Addresses already used**

Error returned by the system if the all or some of the given address are already linked to another site or block.

## **[500 Internal Server Error] System Error**

If the system fails to save changes due to an internal error, it displays an appropriate message and logs the error for further investigation.
