

4.33. Editor - Delete a site

Id	4.33.
Description	As an Editor , I want to be able to delete a site that has been demolished or entered multiple times with different addresses, So that I can correct the registry, avoid confusion and improve reliability on the data.
Priority	Medium
Actors	Editor
API Calls	DELETE /sites/<site-id>
Linked Processes	
Status	Implemented

Preconditions

1. The User must be authenticated and have the **Editor** role.
2. The User has a valid site ID to delete
3. The User has selected a reason for deleting the site

Postconditions

1. The system returns a confirmation that the site has been marked as “to be deleted”.

Main flow

1. The **Organisation Editor** uses an API call to delete a specific site by ID (DELETE).
2. The system validates the input parameters.
3. The system marks the site, its blocks and its units as well as their connections as “to be deleted”. **WARNING: If the site is already used somewhere in the system, the site gets marked as deleted but is kept in the database.**
4. The system returns a confirmation that the site has been marked as “to be deleted”

Exceptions

[400 Bad Request] Invalid input:

If mandatory fields are missing or invalid, the system returns an error message.

[404 Not Found] Site not found

Error returned by the system if the site is not found.

[500 Internal Server Error] System Error

If the system fails to save changes due to an internal error, it displays an appropriate message and logs the error for further investigation.
