

4.38. Editor - Update a unit

Id	4.38.
Description	As an Editor , I want to be able to update wrong or missing unit information, So that I can improve the quality and reliability of the register.
Priority	High
Actors	Editor
API Calls	PUT /units/<unit-id> PATCH /units/<unit-id>
Linked Processes	
Status	Implemented

Preconditions

1. The User must be authenticated and have the **Editor** role.
2. The User has a unit id for which he wants to send an update
3. The User has the mandatory unit information

Postconditions

1. The system returns the updated unit

Main flow

1. The **Editor** uses an API call to update a specific unit by ID (PUT / PATCH).
2. The system validates the input parameters.
3. The system returns the updated unit

Exceptions

[400 Bad Request] Invalid input:

If mandatory fields are missing or invalid, the system returns an error message.

[404 Not Found] Unit not found

Error returned by the system if the given unit does not exist.

[500 Internal Server Error] System Error

If the system fails to save changes due to an internal error, it displays an appropriate message and logs the error for further investigation.
