4.52. Organisation Approver - Approve deleted site request for organisation

Id	4.52.
Description	As an **Organisation Approver**, I need to be able to approve site deletion requests from Editors linked to my Organisation, So that I can guarantee that no site is deleted by mistake and to preserve the quality and reliability of the register
Priority	**Medium**
Actors	Organisation Approver
API Calls	**POST** /sites/<site-id>/approve **POST** /sites/<site-id>/reject **PUT** /sites/<site-id> **PATCH** /sites/<site-id>
Linked Processes	7.7. Approve delete site request
Status	**Implemented**

Preconditions

1. The User must be authenticated and have the **Organisation Approver** role.
2. The User has a valid site ID that is marked as “to be deleted”
3. The delete request has been performed by a user from the Approver’s organisation.

Postconditions

1. The system returns a confirmation that the decision (validation/rejection) has successfully been applied

Main flow

1. The **Organisation Approver** uses an API call to approve/reject the site deletion by ID (POST).
2. The system validates the deletion request.
3. The system returns the confirmation that the request has been approved/rejected

Exceptions

[400 Bad Request] Invalid input:

If mandatory fields are missing or invalid, the system returns an error message.

[404 Not Found] Site not found

Error returned by the system if the site is not found.

[500 Internal Server Error] System Error

If the system fails to save changes due to an internal error, it displays an appropriate message and logs the error for further investigation.
