4.8. Application Administrator - Create access tokens [new]

Id	4.8.
Description	As an **Application Administrator** I need to be able to create access tokens linked to existing users So that I can grant access to the APIs to the different users
Priority	**High**
Actors	Application Administrator
API Calls	**POST** /admin/tokens
Linked Processes	N/A
Status	**Implemented**

Preconditions

1. The User must be authenticated and have the **Application Administrator** role.
2. The User for which the **Application Administrator** wants to create a token must exist on the platform.

Postconditions

1. The User token is generated

Main flow

1. The **Application Administrator** retrieves the users.
2. The **Application Administrator** uses the API to generate a token for the selected user.
3. The system returns the generated token

Exceptions

[400 Bad Request] Invalid input:

If mandatory fields are missing or invalid, the system returns an error message.

[409 Already exists] Token already exists

A token already exists for the given user.

[500 Internal Server Error] System Error

If the system fails to save changes due to an internal error, it displays an appropriate message and logs the error for further investigation.
